## Artificial Intelligence (AI) tools

We currently do not use AI tools in our recruitment processes; however, we understand that you may choose to use AI tools to help you with your application.

If you do, please remember:

- AI-generated answers can often be generic and impersonal, which may not accurately reflect your qualifications, skills, and experiences
- AI-generated applications may lack the personal touch that human-written applications have, this may make you seem less engaged or interested
- Ensure the information provided genuinely represents your own voice and experience
- You must not provide false or misleading information
- If you rely too heavily on AI you might not develop the necessary skills to communicate your experiences and qualifications effectively in interviews or other stages of the hiring process. This may make you come across to the interviewer as a different person to the one that wrote the application form, and you may not be successful in the interview.

## Safer Recruitment Statement

The University of Winchester Academy Trust is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment. We will ensure that all our recruitment and selection practices reflect this commitment. Candidates that are shortlisted will be subject to an online check. All successful candidates will be subject to an Enhanced Disclosure and Barring Service check (DBS) along with other relevant employment checks, including Children's Barred List. Prior to interview, an online search will be carried out on information that is publicly available as part of our due diligence on shortlisted candidates.
